A dynamic Full Stack Developer with a solid foundation in both client and server-side technologies. I excel at transforming complex challenges into streamlined, user-friendly solutions. With hands-on experience in JavaScript frameworks, API development, and database management, I deliver high-quality, maintainable code

TECHNICAL SKILLS

- **Programming Languages:** Javascript
- **Frameworks & Libraries:** React, Bootstrap, Tailwind, ExpressJS
- **Database:** MongoDB, MySQL.
- **Version Control Systems:** Git, Github.
- **Others:** Testing, API Development, Software Development Life Cycle (SDLC), Agile methodologies.

SKILLS

- I'm an active participator when collaborating with others.
 - I point out ideas that can foster better results.
 - I'm disciplined.
 - I prioritize time management.
-

PROFESSIONAL EXPERIENCE

Nestle Nigeria | Engineering & Automation Dept

Sept 2024 - Present

Nysc Intern

- Installation, configuration & maintenance of hardware systems, including a range of devices from Biometric access control systems to automated doors.
- Inspection and tagging of equipment's to indicate its status, safety conditions, and readiness for use.

GOMYCODE

Jan 2023 - Jun 2023

Full Stack Developer

(6 Months)

- Developed a video chat application web app.
- Built experience in project management (how to properly schedule projects, understand the requirements of stakeholders and align solutions to tailor to their needs).

CT Digital

Dec 2022 - Jun 2023

Full Stack Developer

(6 Months)

- Worked closely with the Product designer to build a streamlined event management website where clients could book events making registration process faster and less tedious. The site was fully responsive and developed with html, css and javascript.
 - Integrated a discount page section for a clinic web app where patients could generate coupons as discount codes.
-
